Graph Walk

1. Recording start - narrator

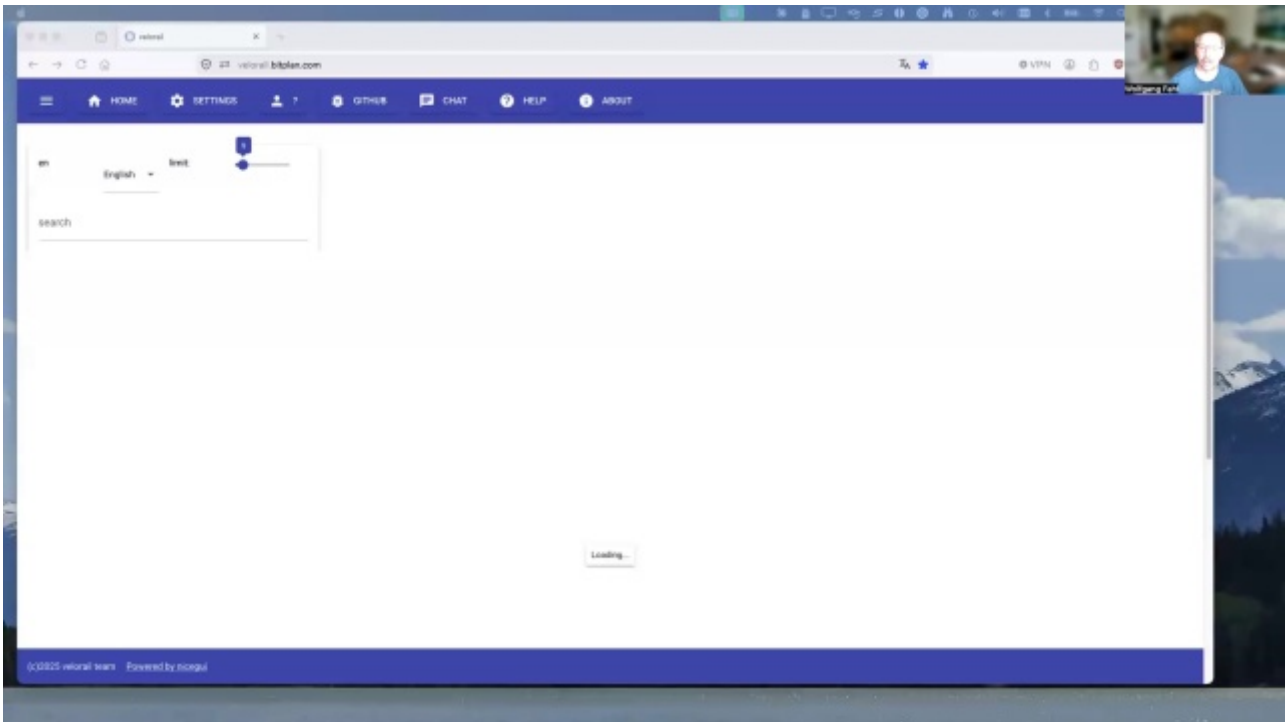

00:00

Wolfgang Fahl states the goal of the walk - to show how a complete wiki can be generated from a video specification - and starts sharing the screen

2. velorail.bitplan.com - home

00:12

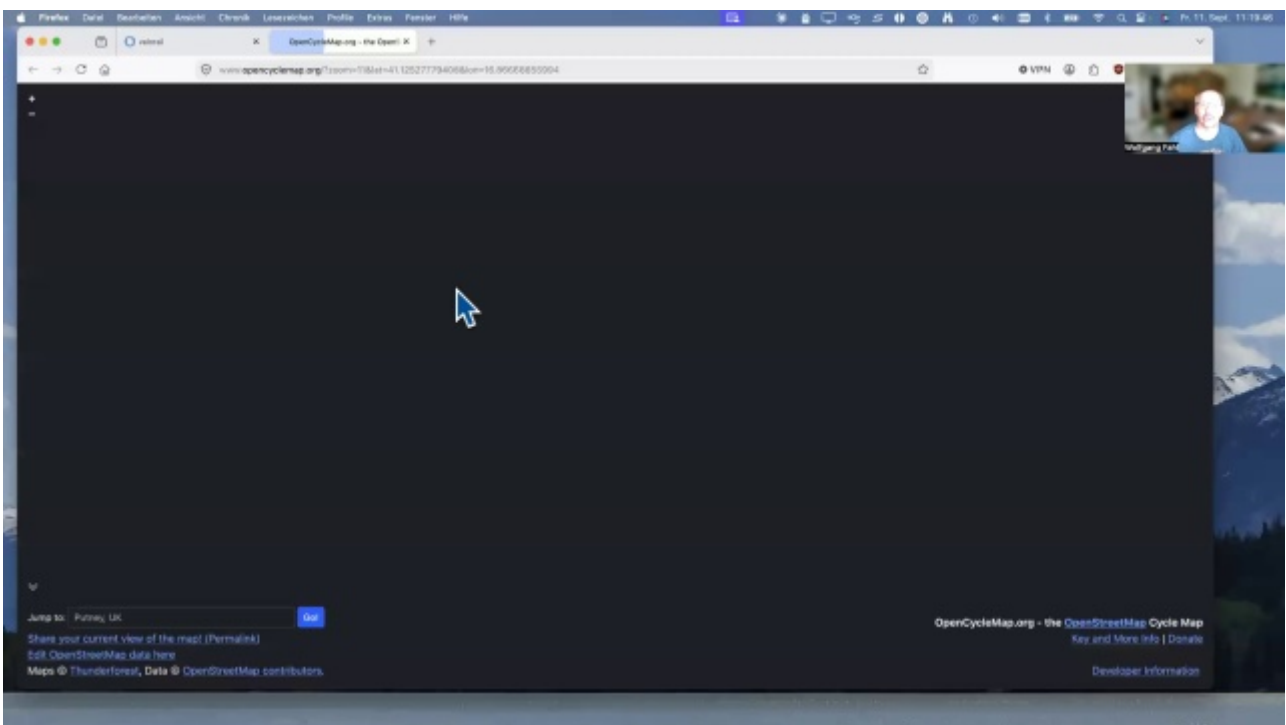

<https://velorail.bitplan.com/>

velorail, an application showing maps for a place; the walk starts with Bari, a city in southern Italy

3. OpenCycleMap - Bari

00:39

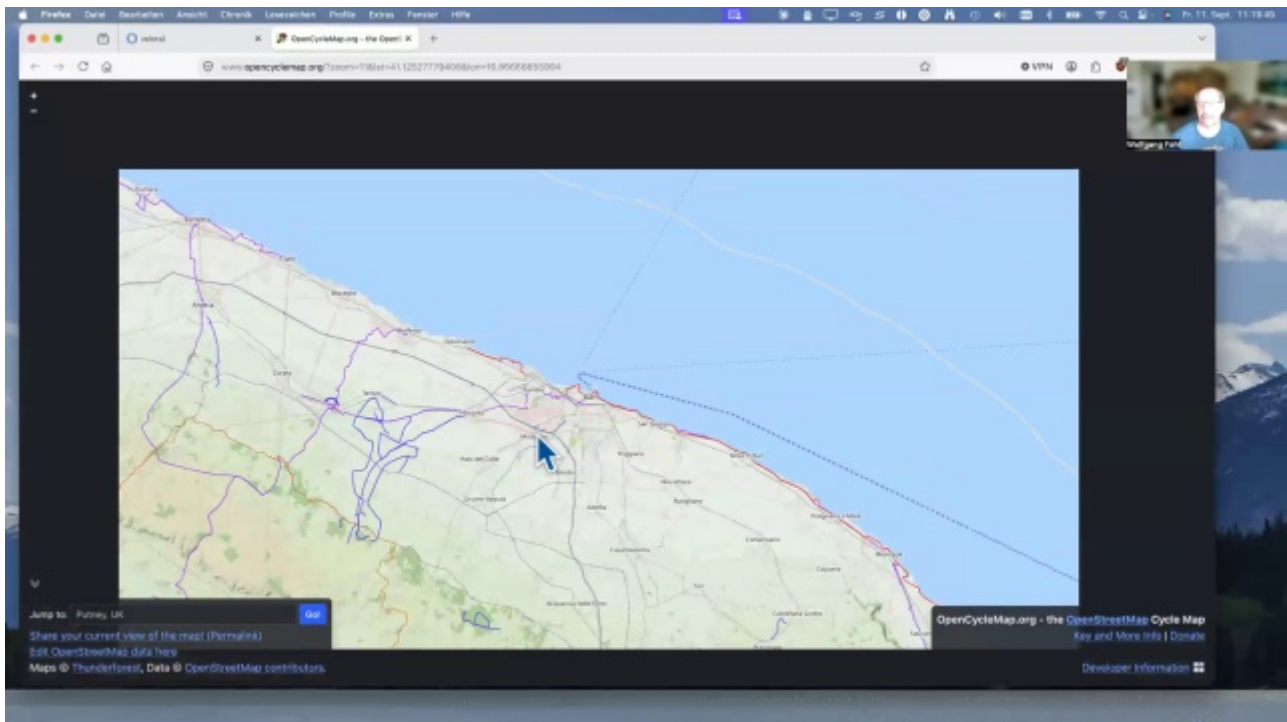

<https://www.opencyclemap.org/>

the bike routes map option opens OpenCycleMap around Bari

4. OpenCycleMap - Italy and the Adriatic

00:41

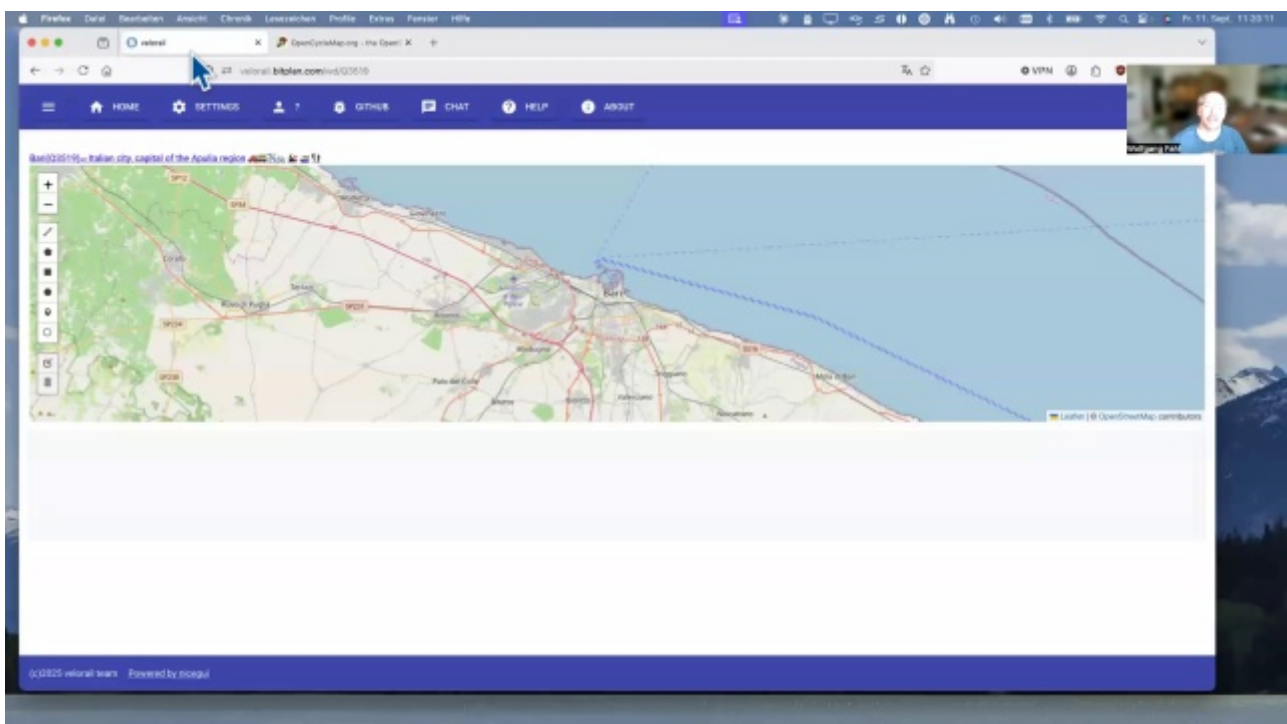

<https://www.opencyclemap.org/>

zoomed out, where one can go from Bari - Brindisi, inland to Rome, north to Slovenia; the plan is Bari in October and on to Ljubljana

5. velorail.bitplan.com - Bari

01:03

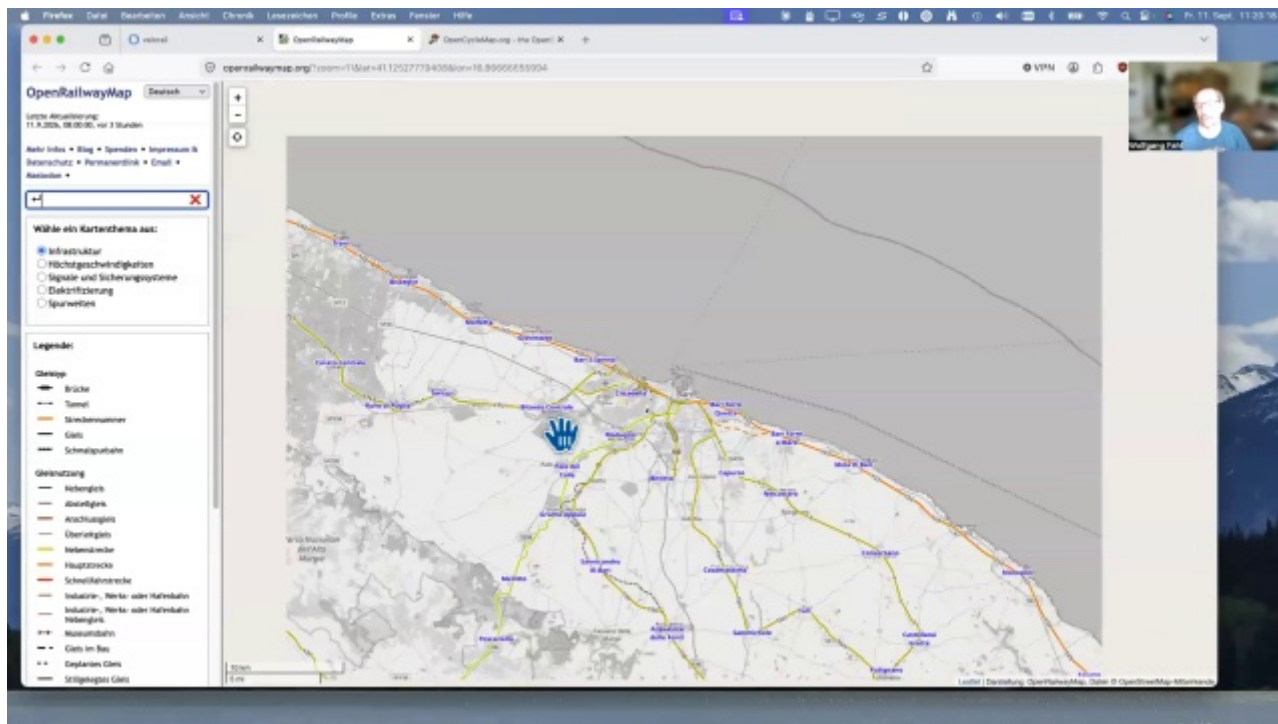

<https://velorail.bitplan.com/wd/Q3519>

the Bari page of velorail with its map options, the Wikidata item Q3519 in the url

6. OpenRailwayMap - Bari

01:10

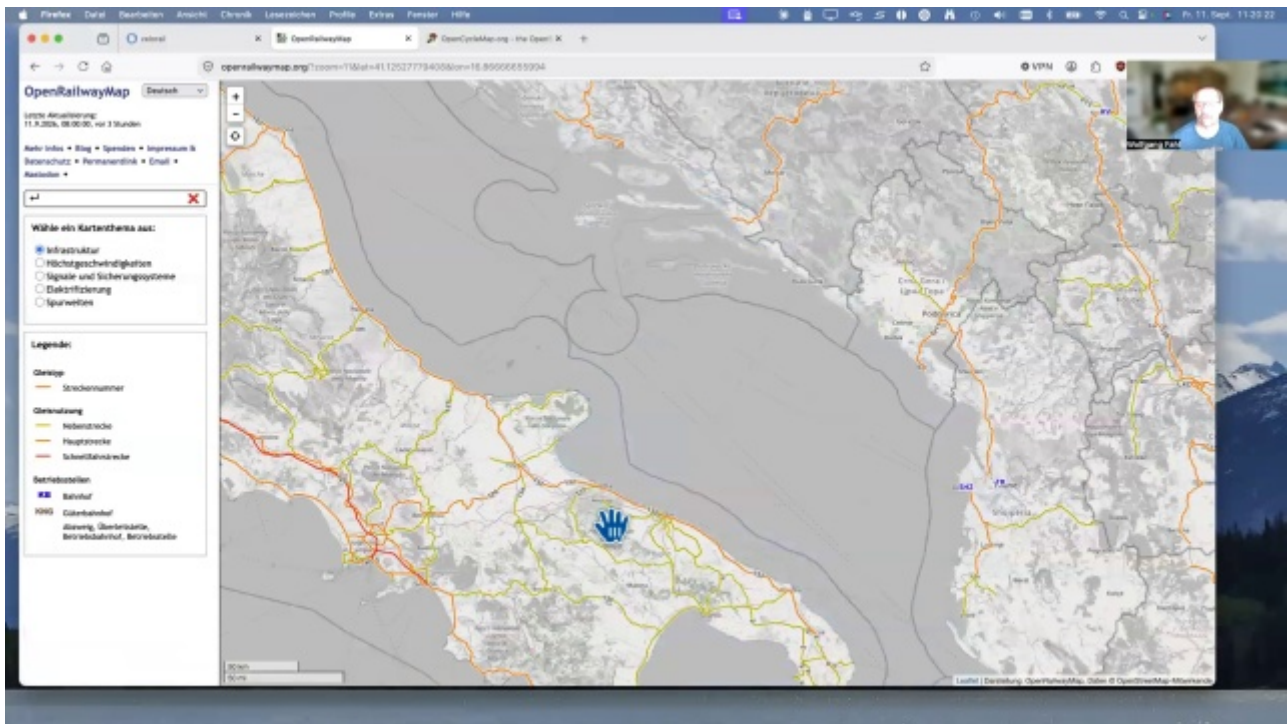

<https://www.openrailwaymap.org/>

the train option opens OpenRailwayMap around Bari

7. OpenRailwayMap - Italy and the Adriatic

01:14

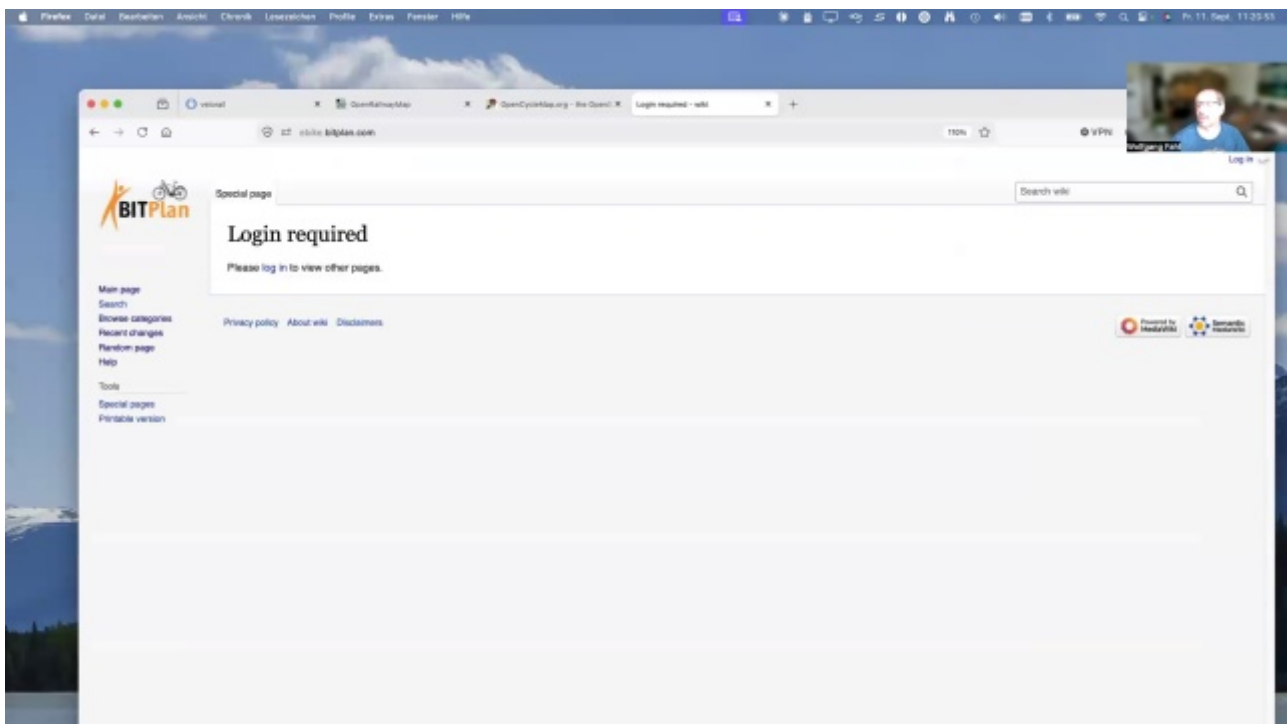

<https://www.openrailwaymap.org/>

zoomed out - about 1200 km from Bari to Ljubljana, most of it by train, or the ferry across the Adriatic

8. ebike.bitplan.com - Login required

01:46

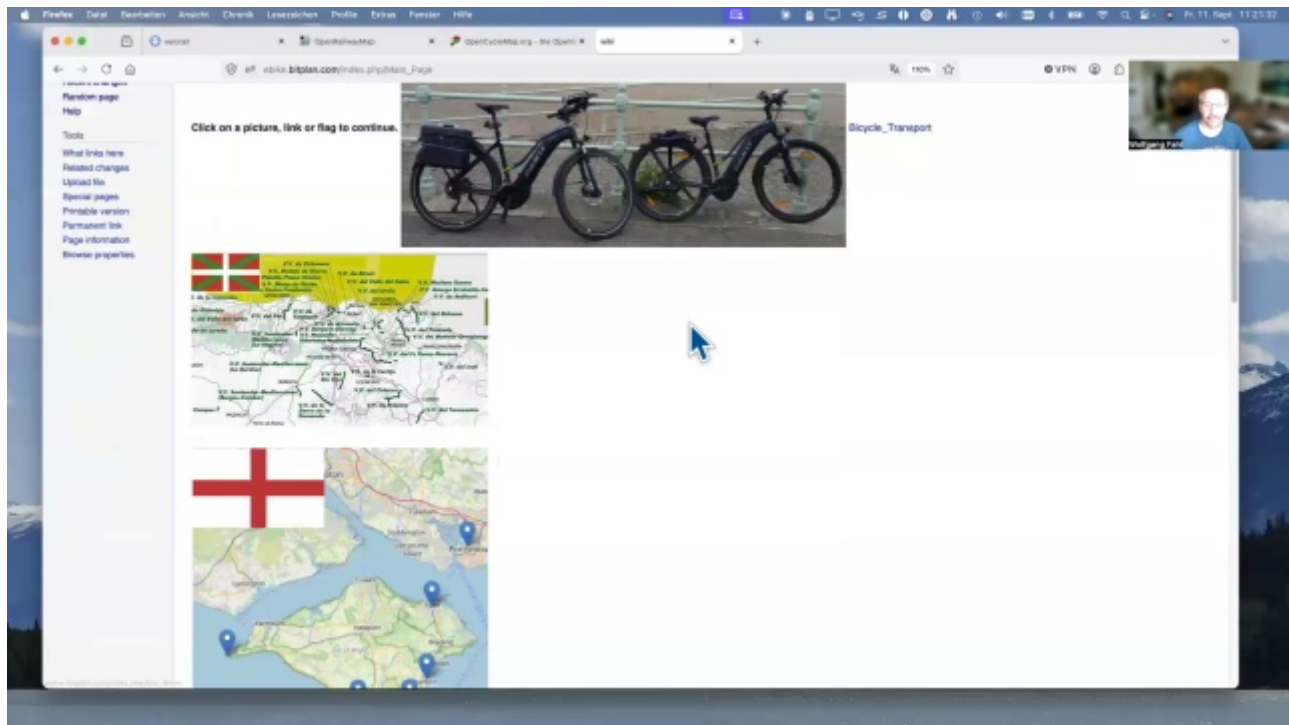

https://ebike.bitplan.com/index.php/Main_Page

the existing trip wiki asks for a login before any page shows - a bit frustrating, username and

password entered

9. ebike.bitplan.com - Main Page

02:24

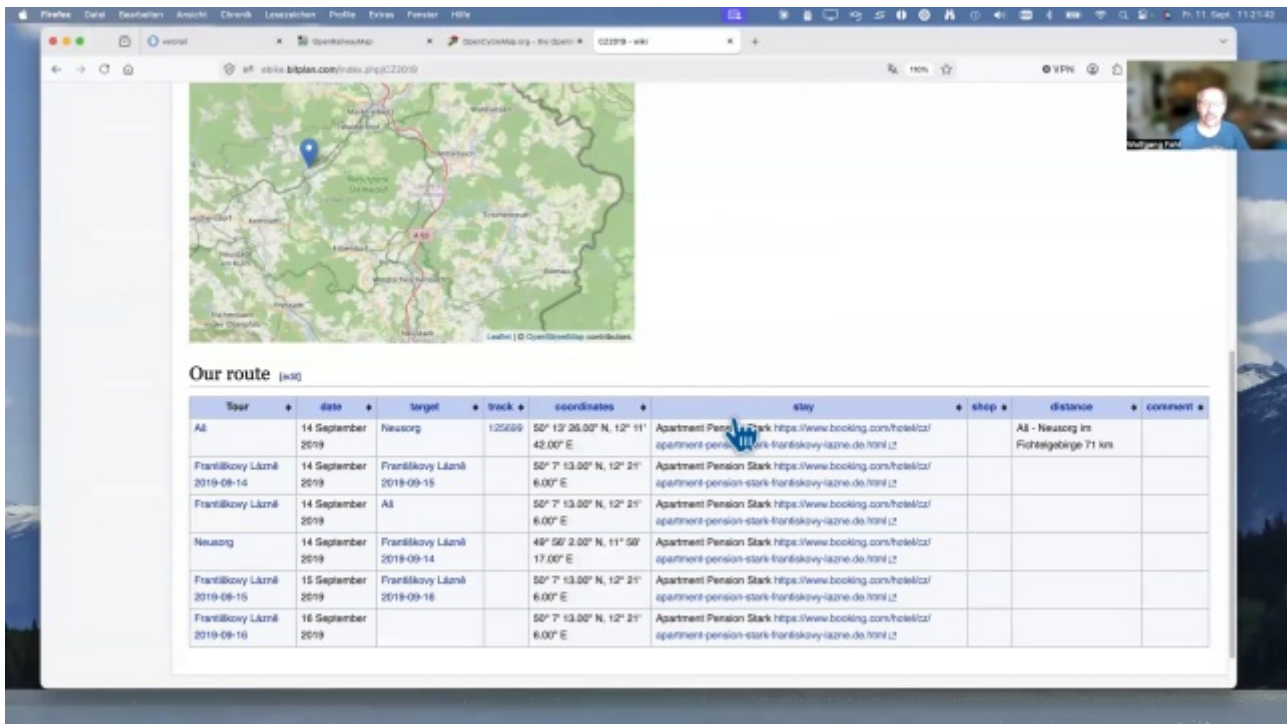

https://ebike.bitplan.com/index.php/Main_Page

the wiki used in the past to track places visited - Isle of Wight, Czech Republic, England, Italy - with a bicycle photo and maps as entry points

10. ebike.bitplan.com - CZ2019

02:35

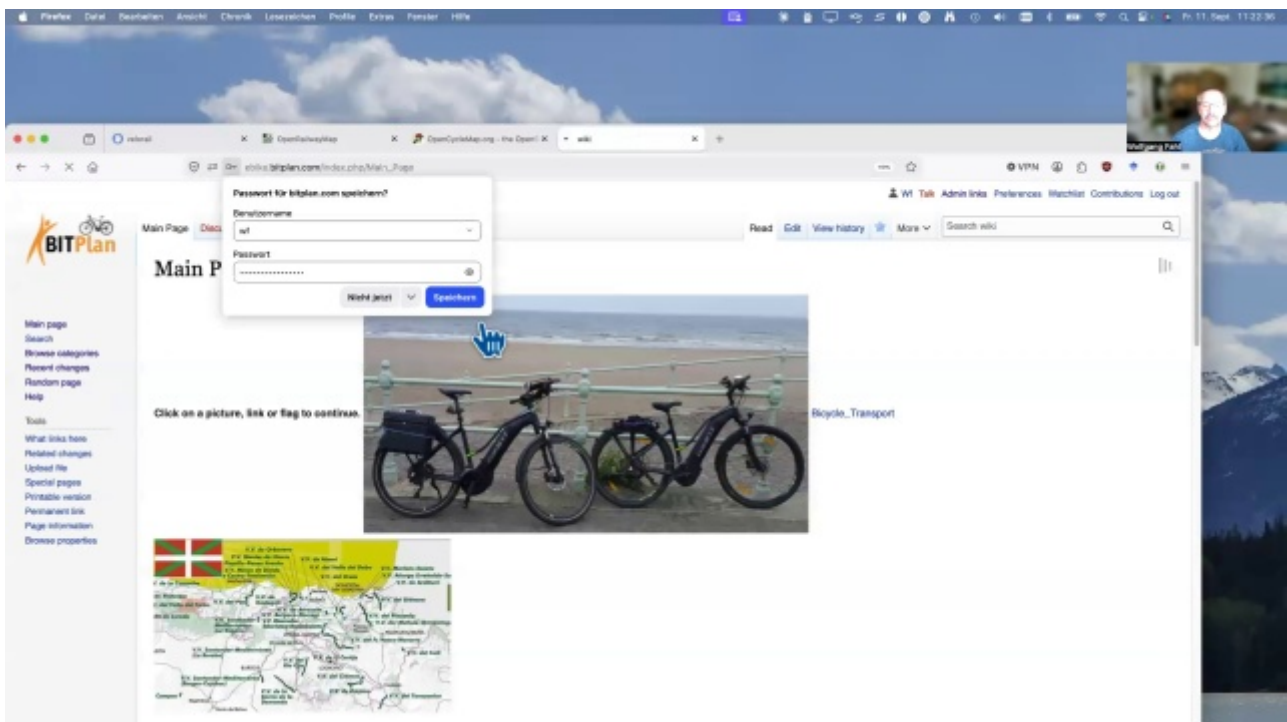

<https://ebike39.bitplan.com/index.php/CZ2019>

a trip page with the Our route table - tour, date, target, track, coordinates, stay, shop, distance, comment; organized around trips, this trip has no legs

11. ebike39.bitplan.com - Login required

03:28

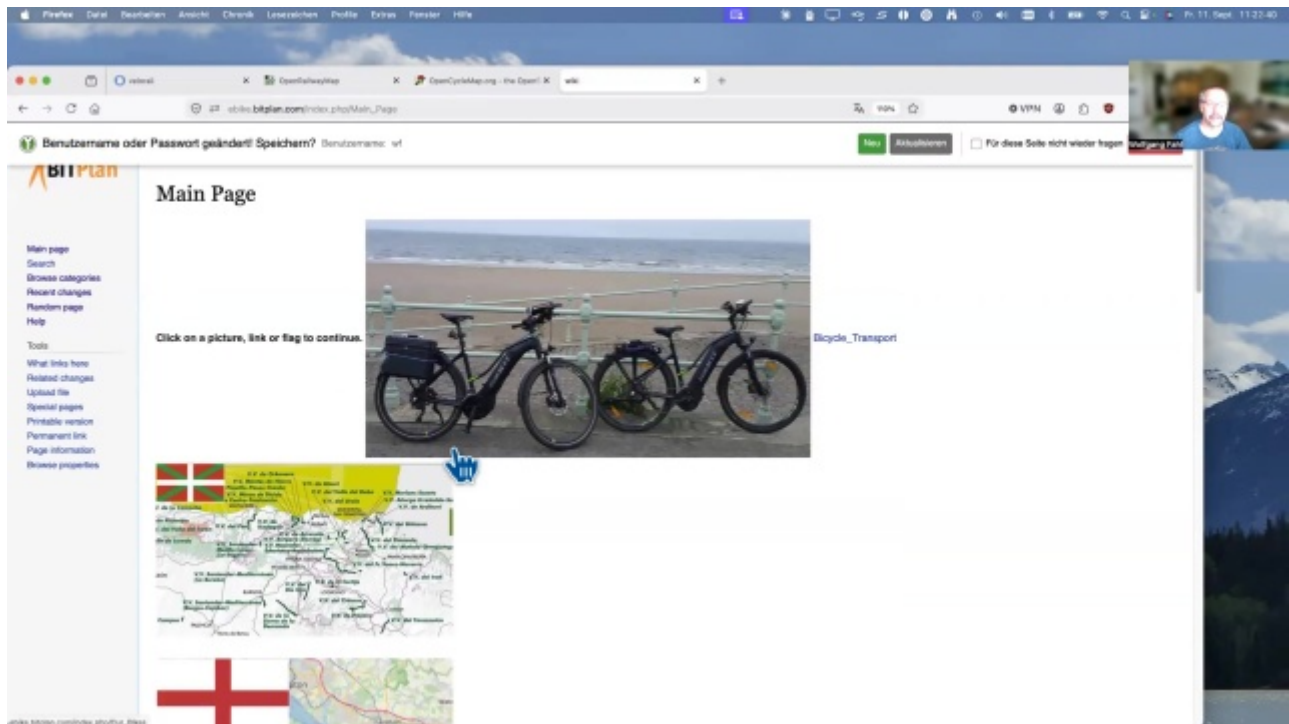

https://ebike39.bitplan.com/index.php/Main_Page

the newer ebike39 wiki, which worked with legs, asks for the login as well - same password

12. ebike39.bitplan.com - Main Page

03:33

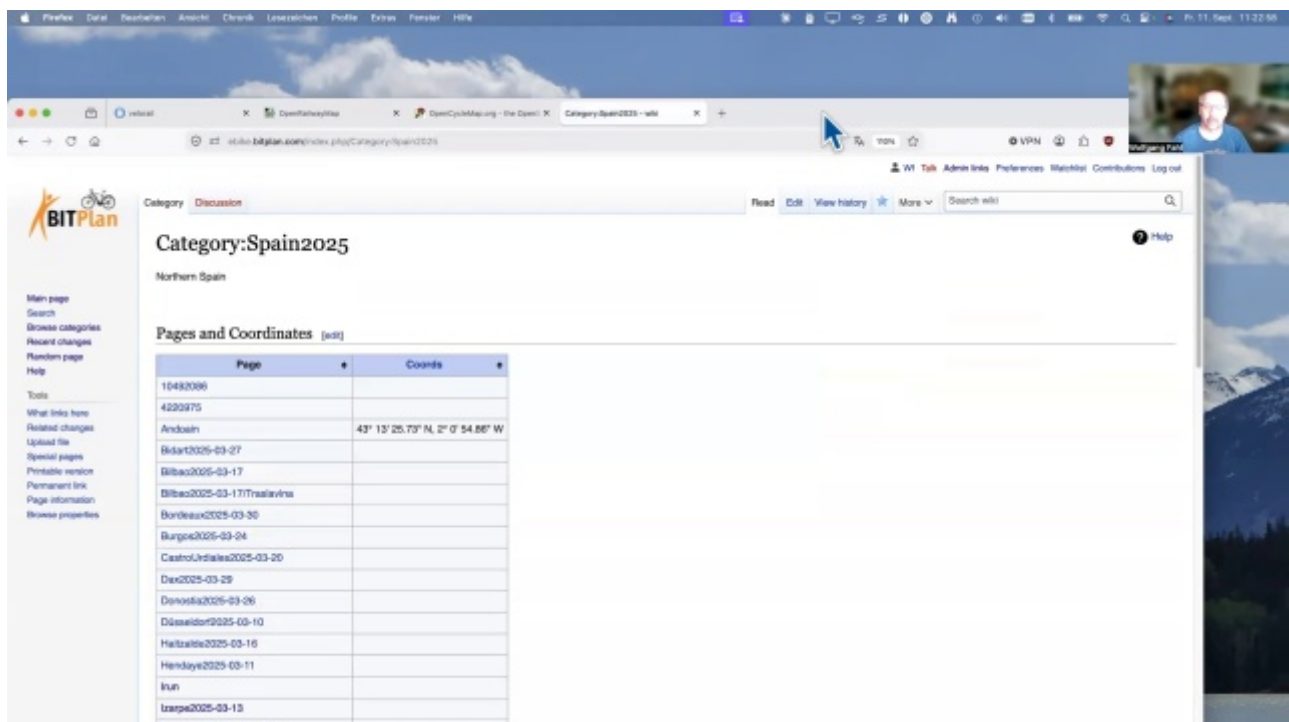

https://ebike39.bitplan.com/index.php/Main_Page

the new version of the trip wiki after login, with the browser offering to save the changed password

13. ebike39.bitplan.com - Category:Spain2025

03:50

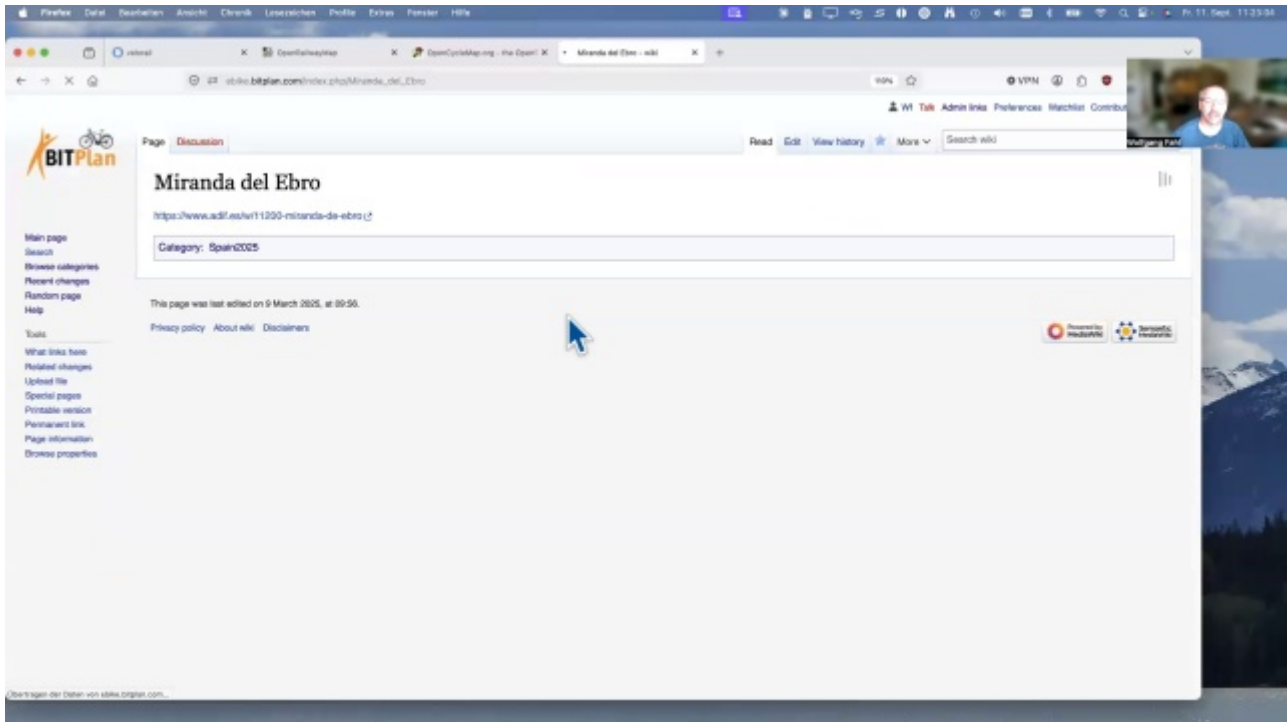

<https://ebike39.bitplan.com/index.php/Category:Spain2025>

Spain 2025 is where things were done differently - a page per place with coordinates, listed in the category

14. ebike39.bitplan.com - Miranda del Ebro

03:56

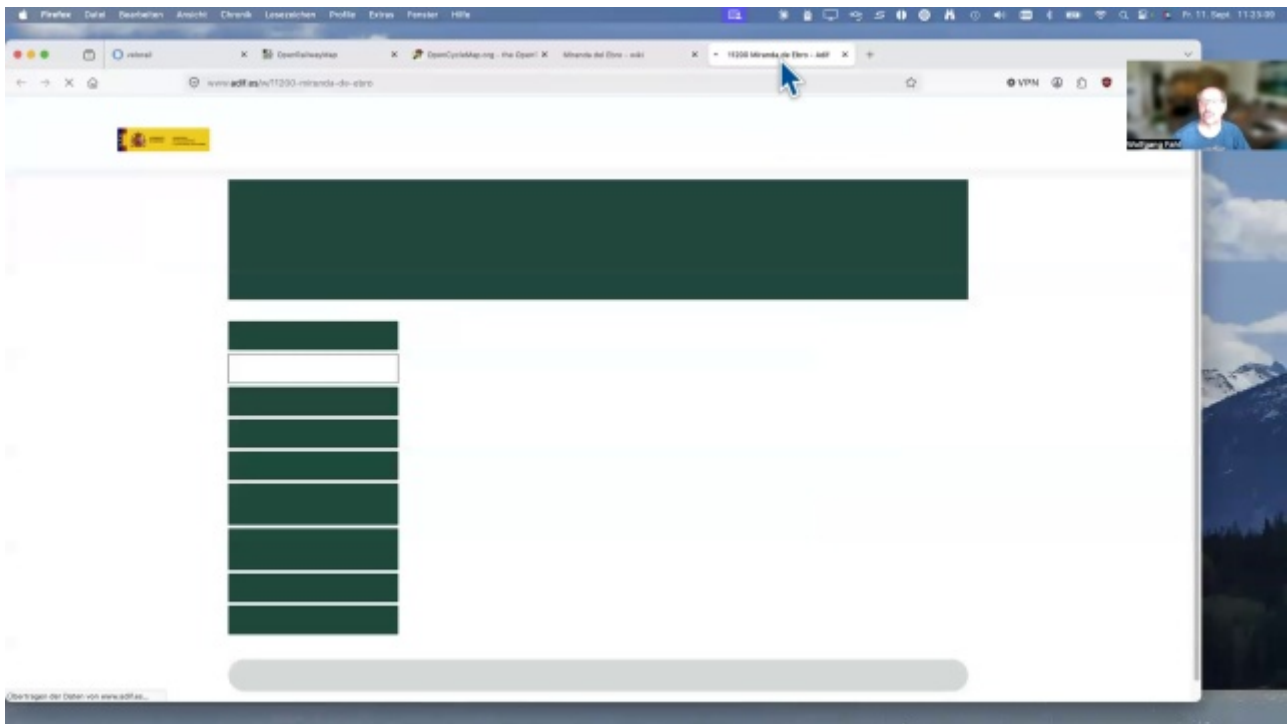

https://ebike39.bitplan.com/index.php/Miranda_del_Ebro

a place page holding only a link to the railway station - not very structured, a page and coordinates

15. adif.es - 11200 Miranda de Ebro

04:01

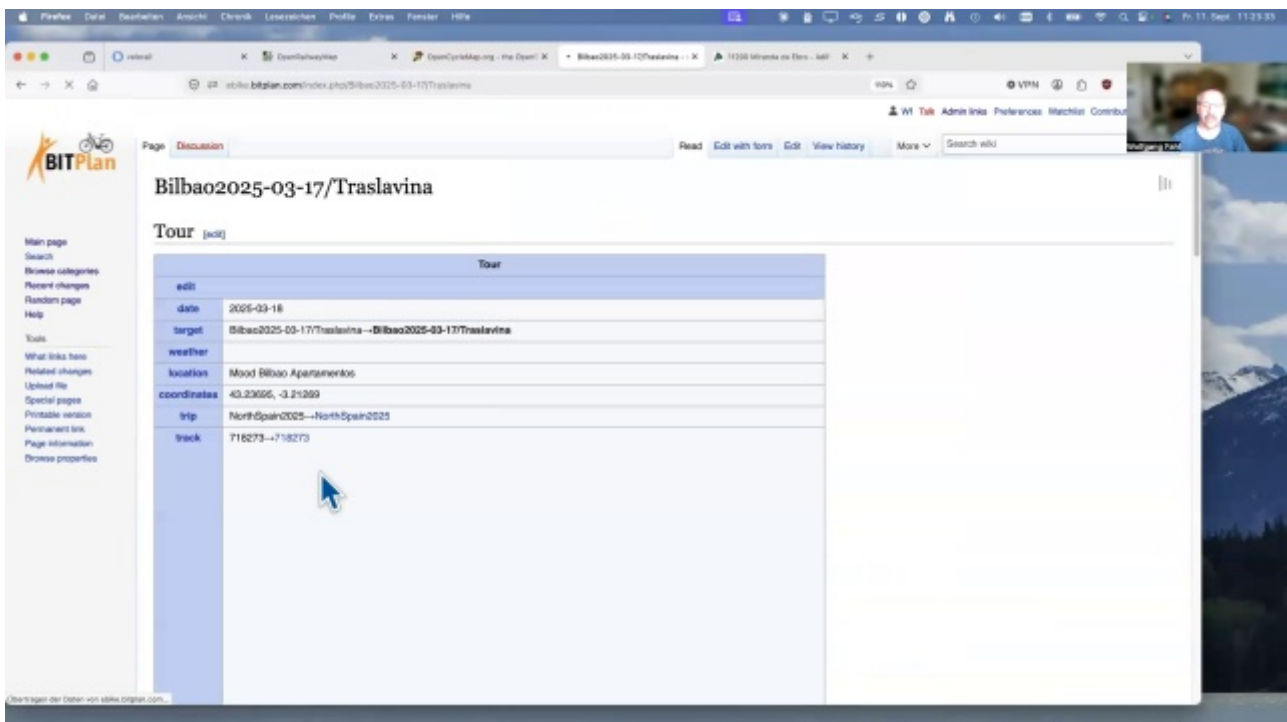

<https://www.adif.es/w/11200-miranda-de-ebro>

the Adif station page the place page links to; reachable in the browser, the site answers 403 to non-browser clients

16. ebike39.bitplan.com - Bilbao2025-03-17/Traslavina

04:25

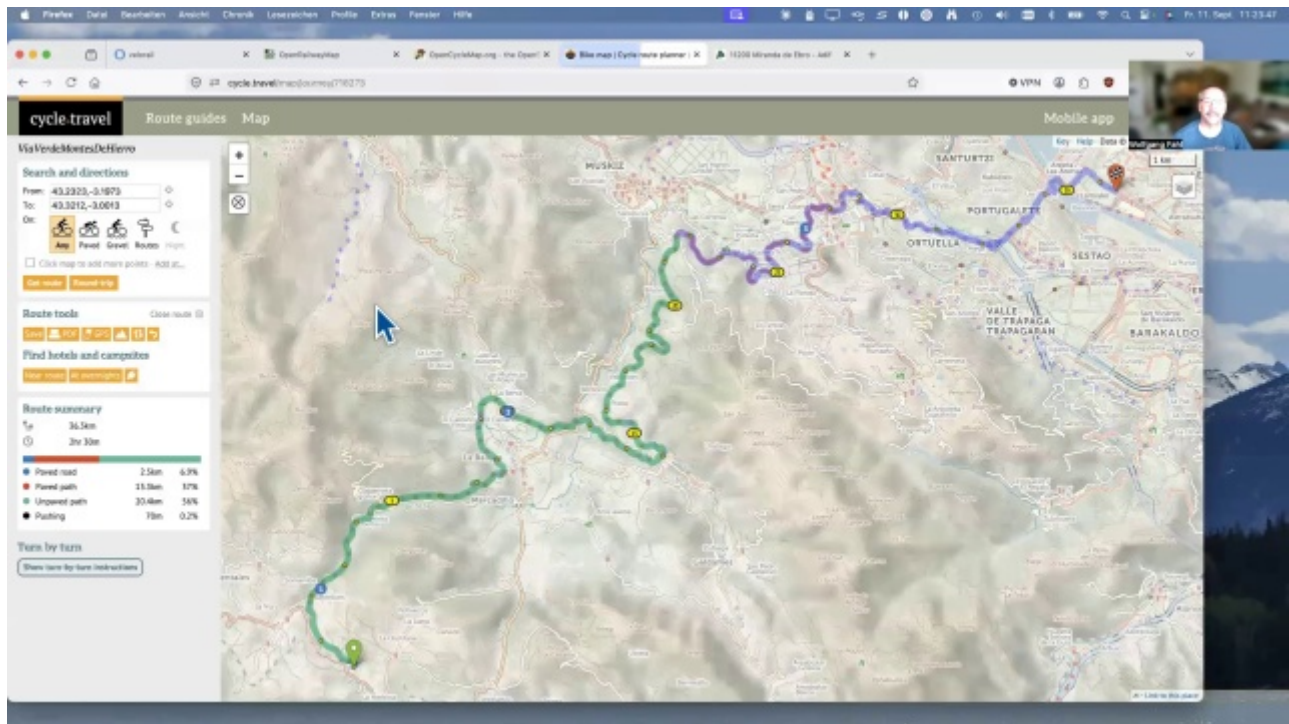

<https://ebike39.bitplan.com/index.php/Bilbao2025-03-17/Traslavina>

a Tour page - date, target, location, coordinates, trip and track - with the track rendered as a map

17. cycle.travel - journey 718273

04:39

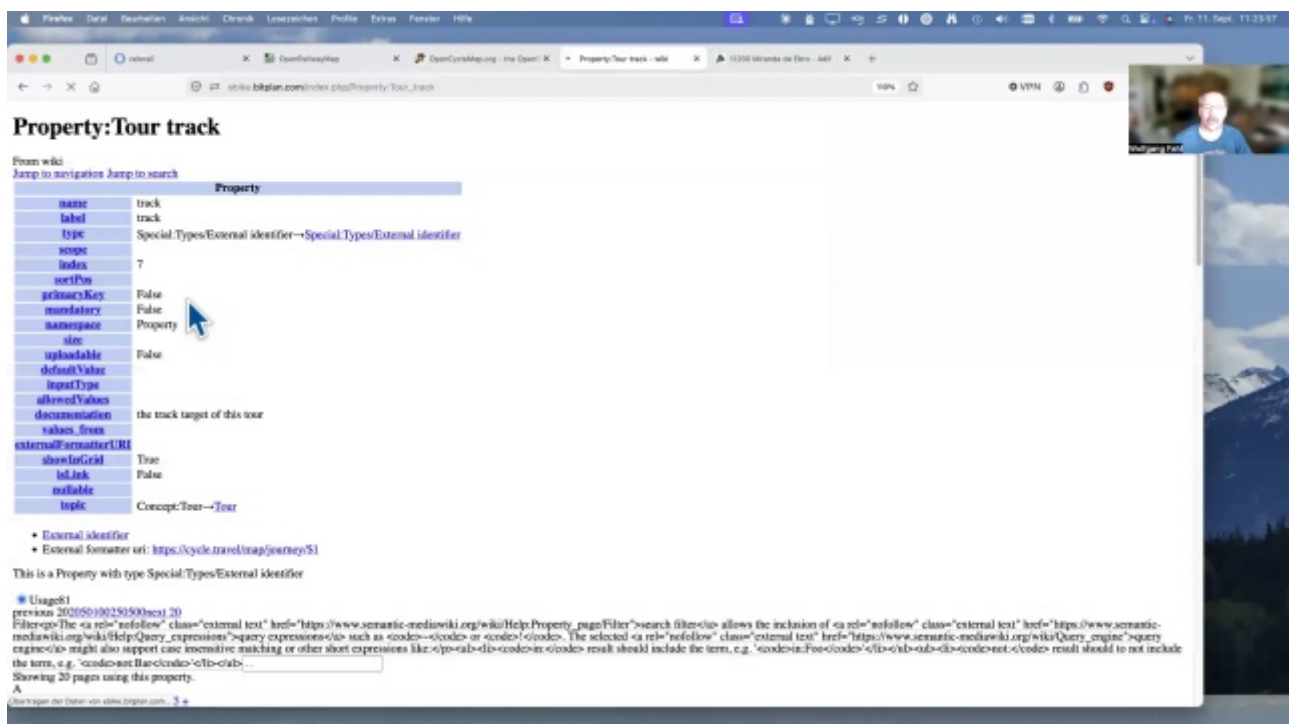

<https://cycle.travel/map/journey/718273>

the track link opens the route on cycle.travel; reachable in the browser, the site answers 403 to non-browser clients

18. ebike39.bitplan.com - Property:Tour track

04:49

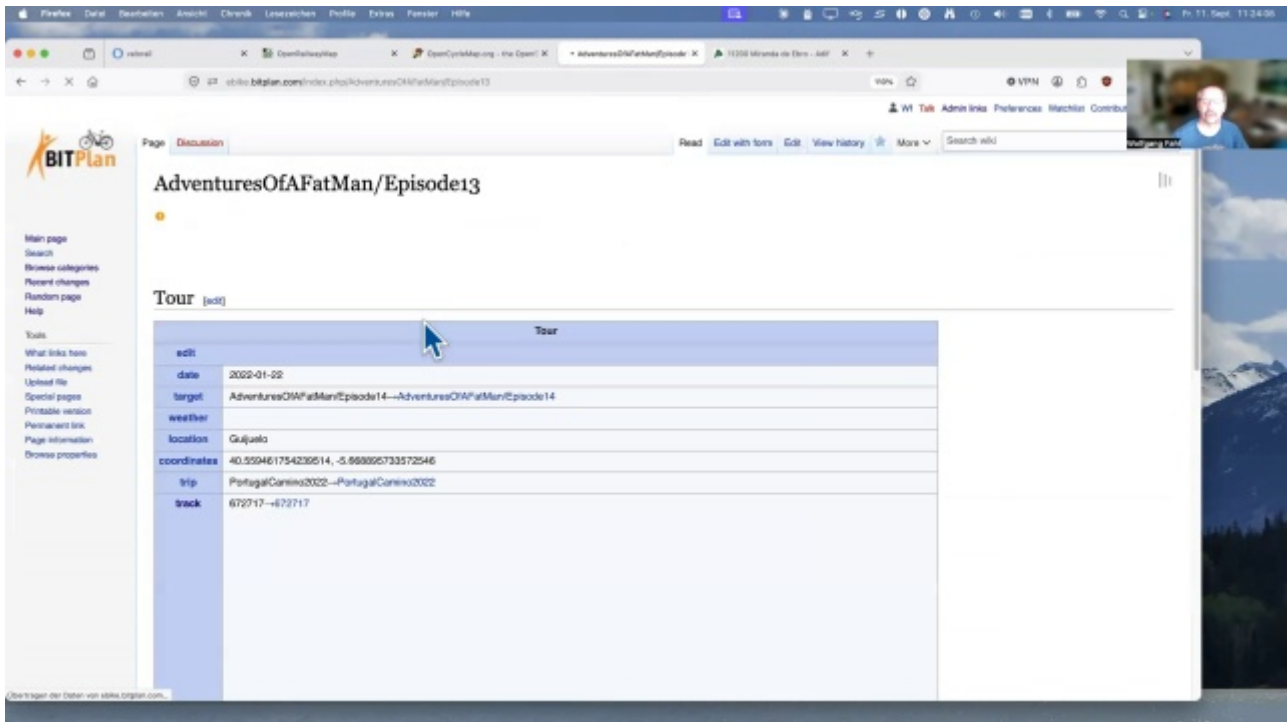

https://ebike39.bitplan.com/index.php/Property:Tour_track

the track property is an external identifier whose formatter url points to cycle.travel

19. ebike39.bitplan.com - AdventuresOfAFatMan/Episode13

05:00

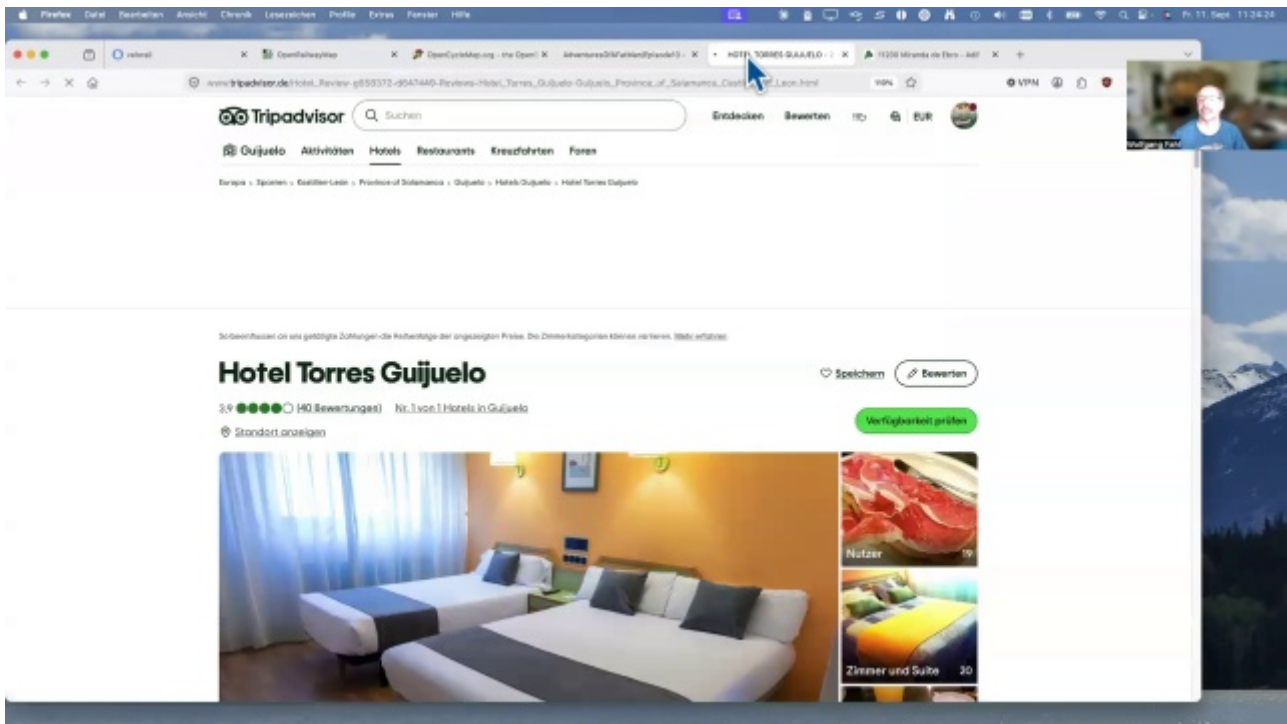

<https://ebike39.bitplan.com/index.php/AdventuresOfAFatMan/Episode13>

a tour page derived from a YouTube series - episode 13 with target, location Guijuelo, trip PortugalCamino2022, track and the embedded video

20. Tripadvisor - Hotel Torres Guijuelo

05:17

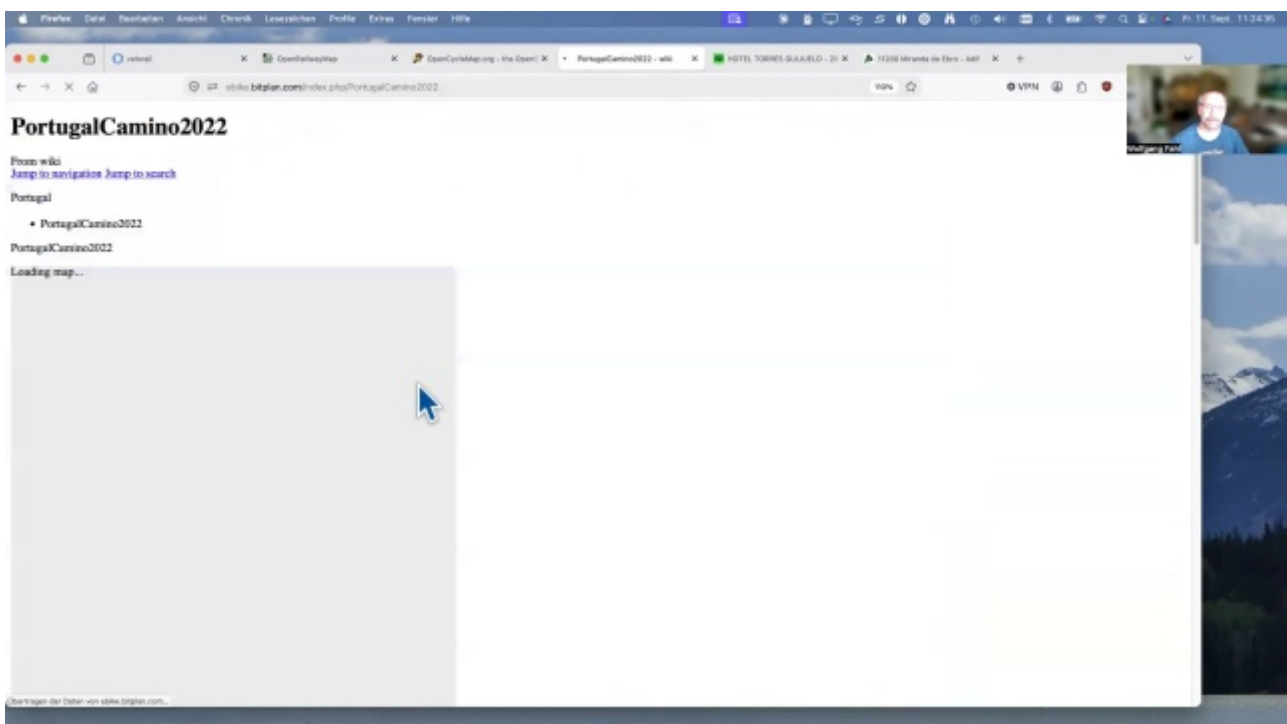

https://www.tripadvisor.de/Hotel_Review-g658372-d647449-Reviews-Hotel_Torres_Guijuelo-Guijuelo_Province_of_Salamanca_Castile_and_Leon.html

the stay link of the episode - where the fat man stayed

21. ebike39.bitplan.com - PortugalCamino2022

05:27

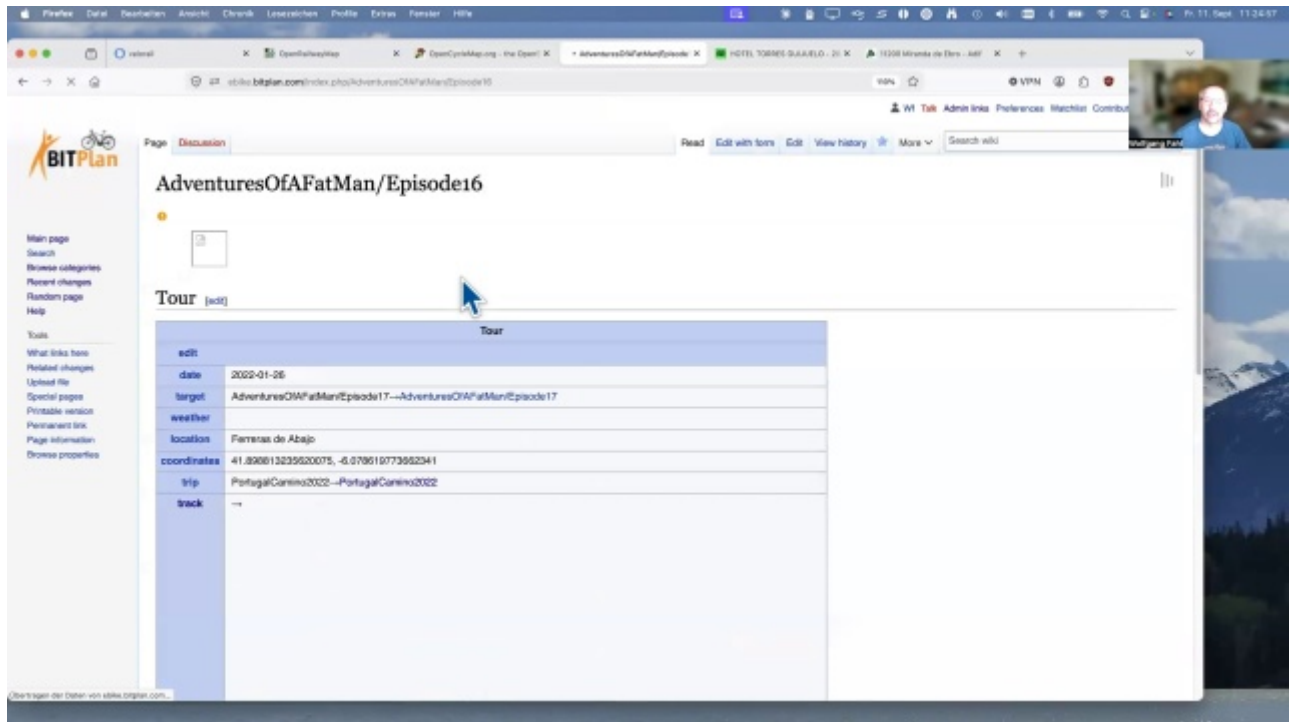

<https://ebike39.bitplan.com/index.php/PortugalCamino2022>

the trip page as the root of the episodes; each episode has a target and a track, each page a location

and coordinates

22. ebike39.bitplan.com - AdventuresOfAFatMan/Episode16

05:50

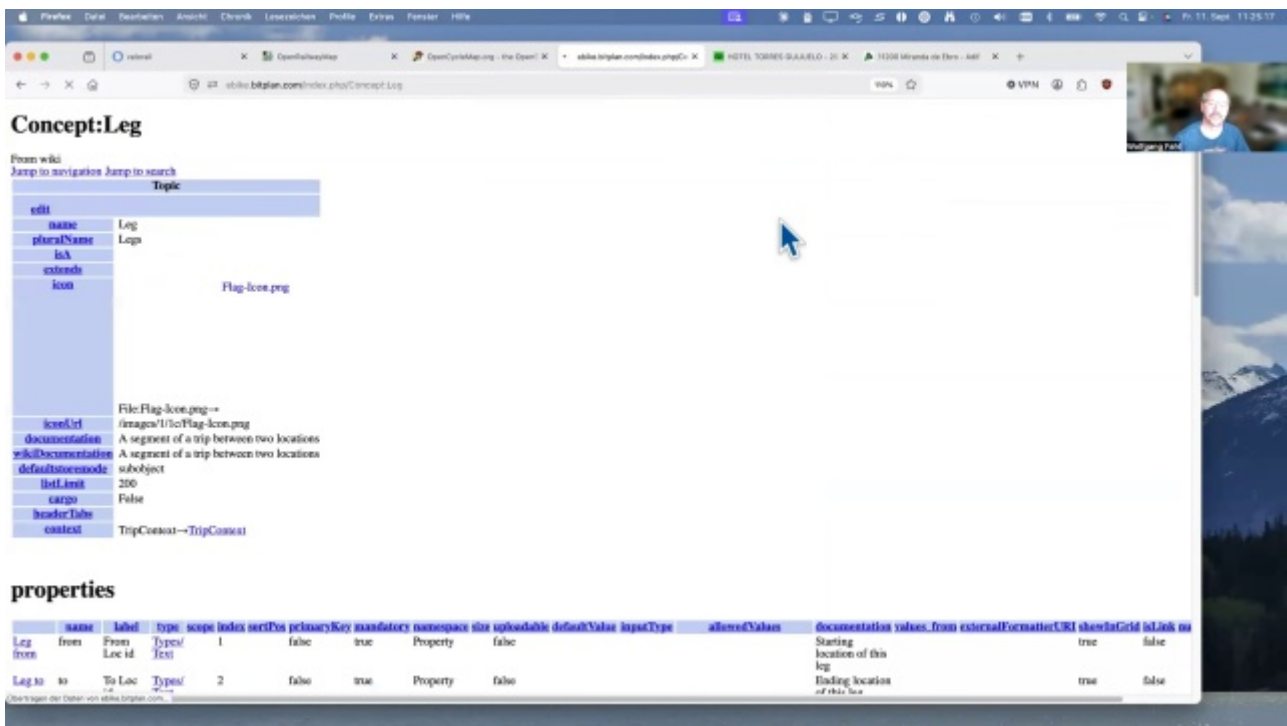

<https://ebike39.bitplan.com/index.php/AdventuresOfAFatMan/Episode16>

episode 16 as a second tour page of the series

23. ebike39.bitplan.com - Concept:Leg

06:09

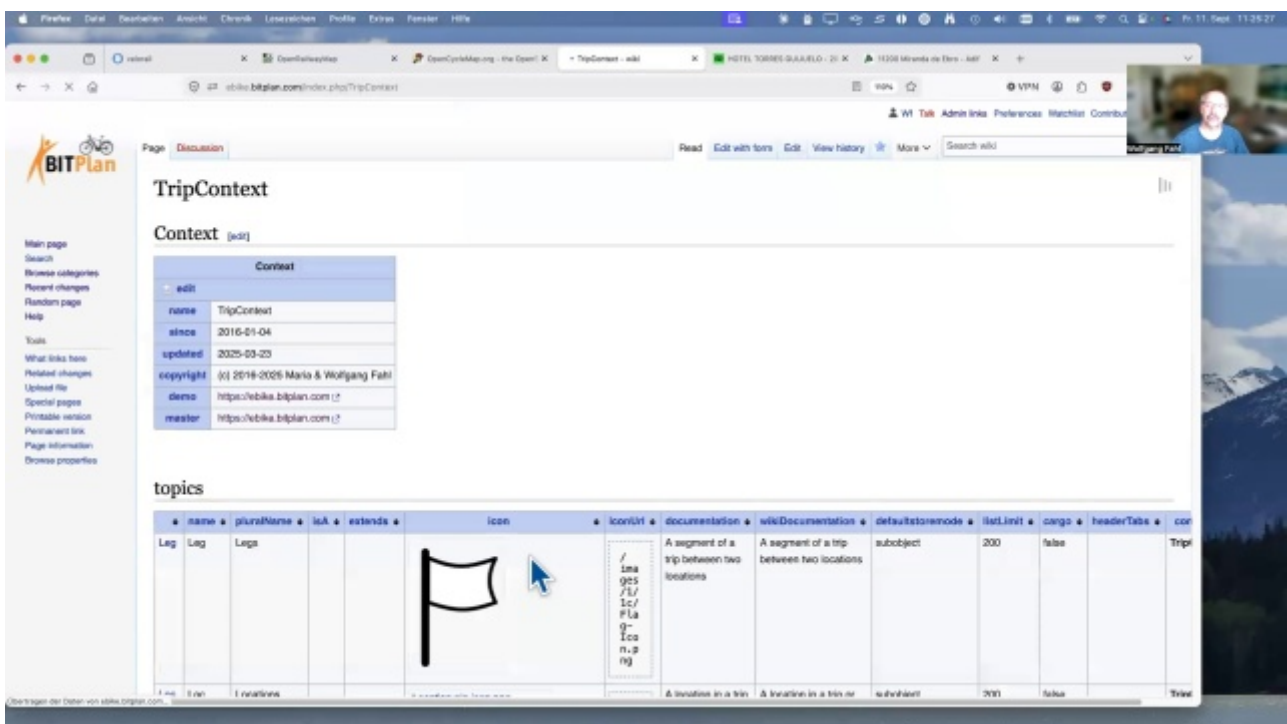

<https://ebike39.bitplan.com/index.php/Concept:Leg>

the concept Leg with its properties from, to, transport and wp_num, plus the uml view - the concept the narrator prefers over the flat tour table

24. ebike39.bitplan.com - TripContext

06:19

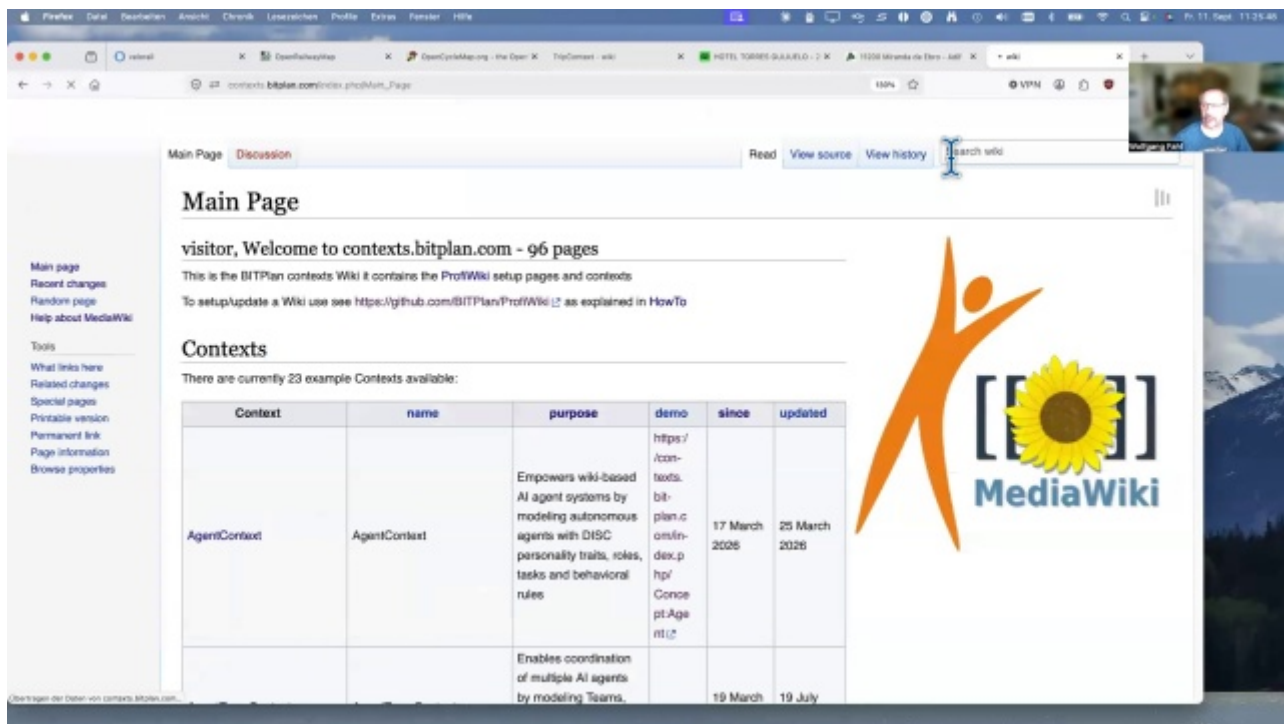

<https://ebike39.bitplan.com/index.php/TripContext>

the TripContext already exists with the topics Leg, Loc and Tour and an example of how it is used

25. contexts.bitplan.com - Main Page

06:40

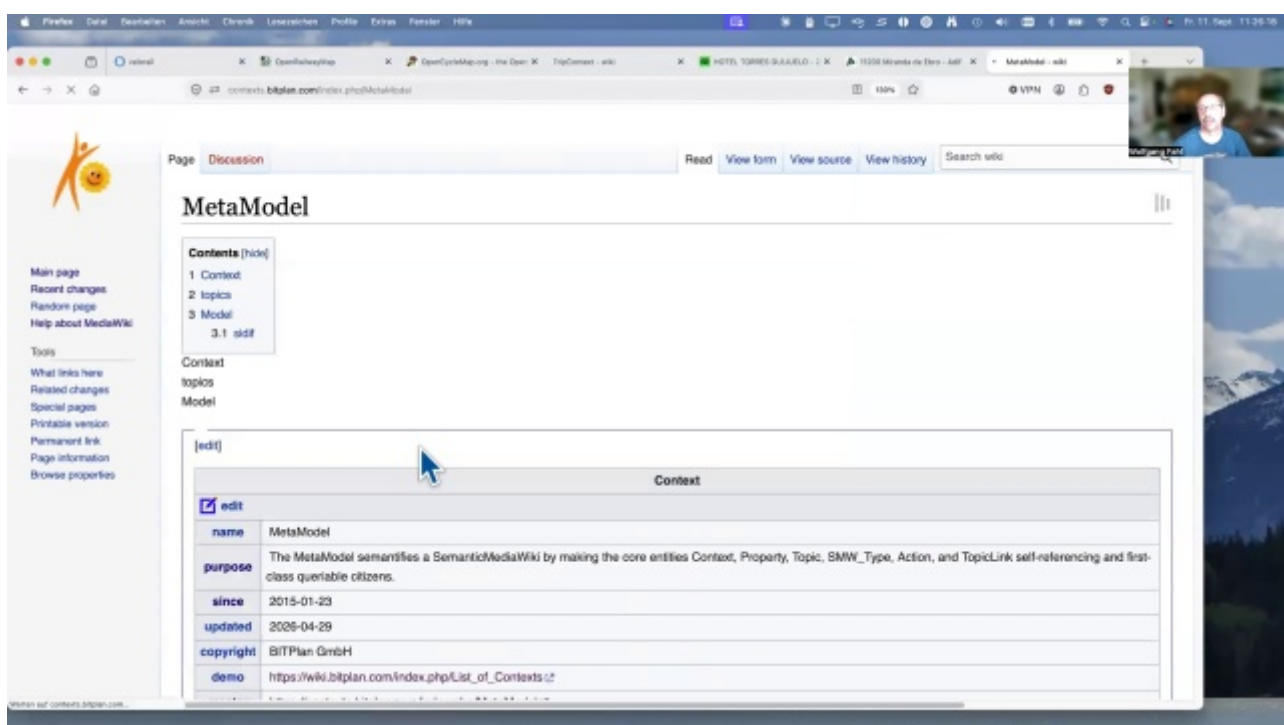

https://contexts.bitplan.com/index.php/Main_Page

the list of 23 contexts on contexts.bitplan.com - the TripContext is not among them; the question is how to get it there

26. contexts.bitplan.com - MetaModel

07:10

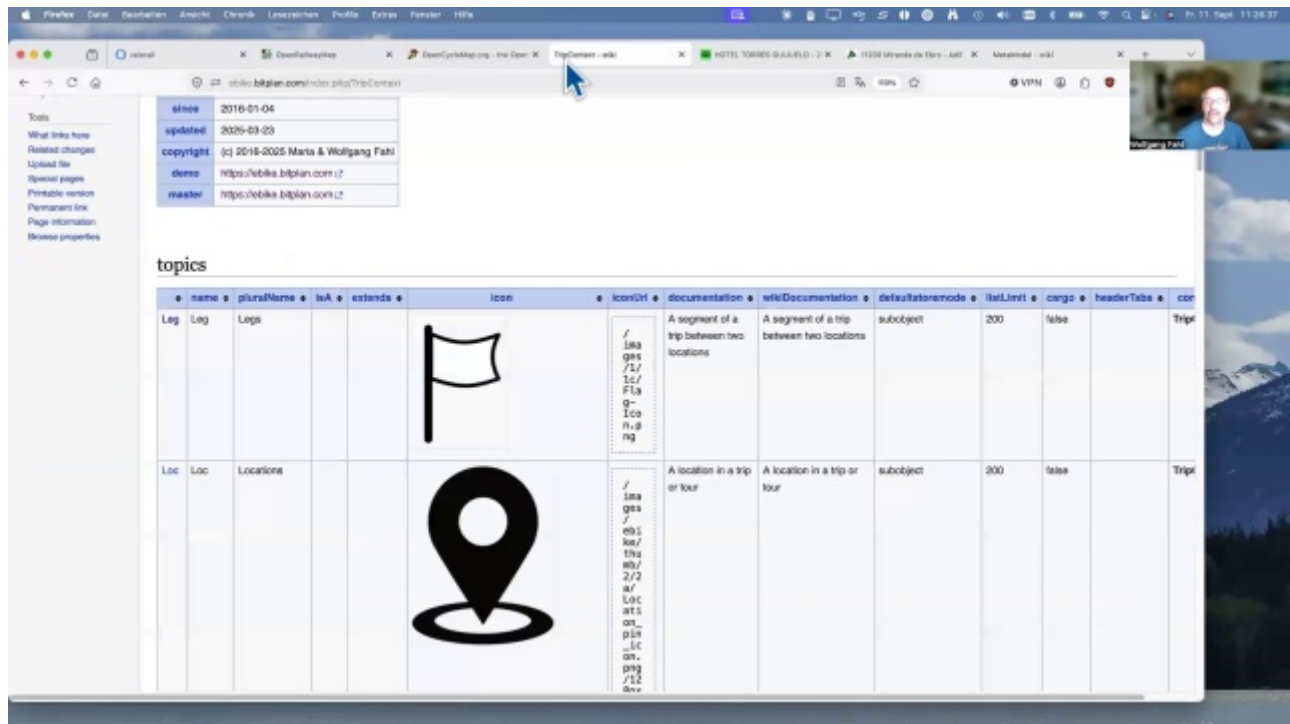

<https://contexts.bitplan.com/index.php/MetaModel>

the MetaModel is the most important context, it organizes the wikis - a context has topics, and an AI reading this video finds the MetaModel here

27. ebike39.bitplan.com - TripContext topics

07:30

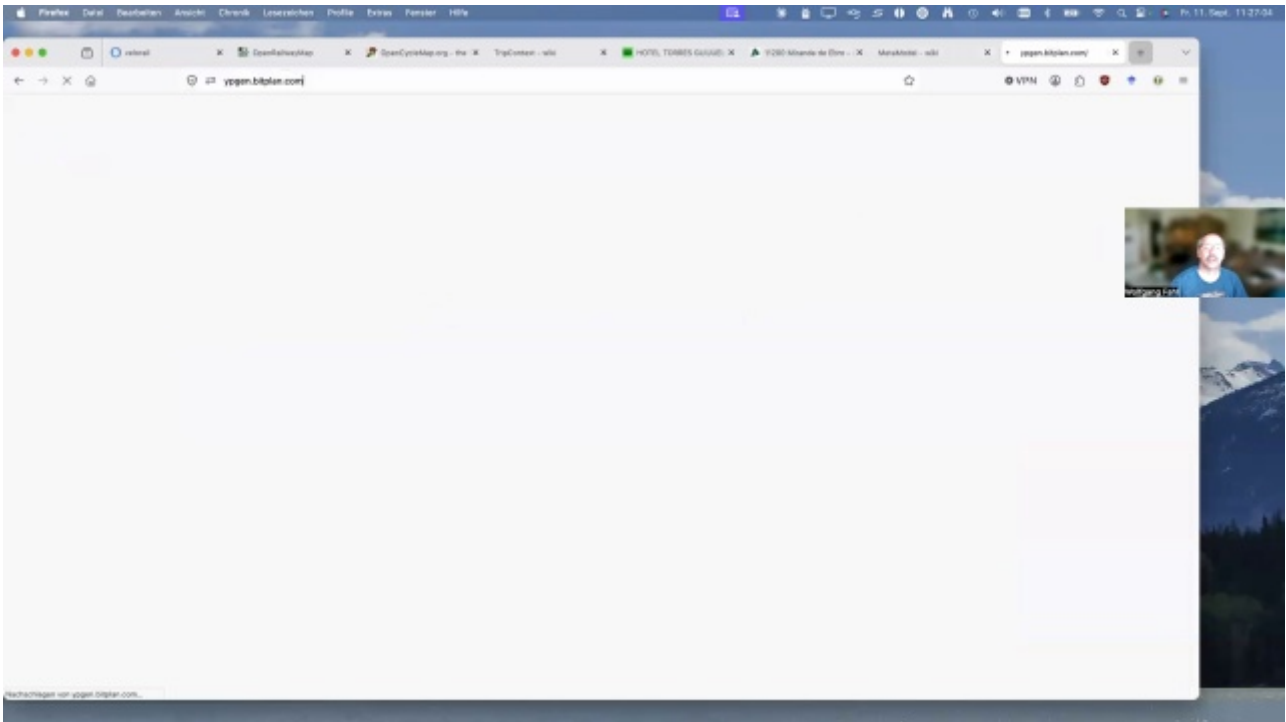

<https://ebike39.bitplan.com/index.php/TripContext>

back on the TripContext - the one to improve and to check against the needs, to be shown off on contexts.bitplan.com

28. ypgen.bitplan.com

07:56

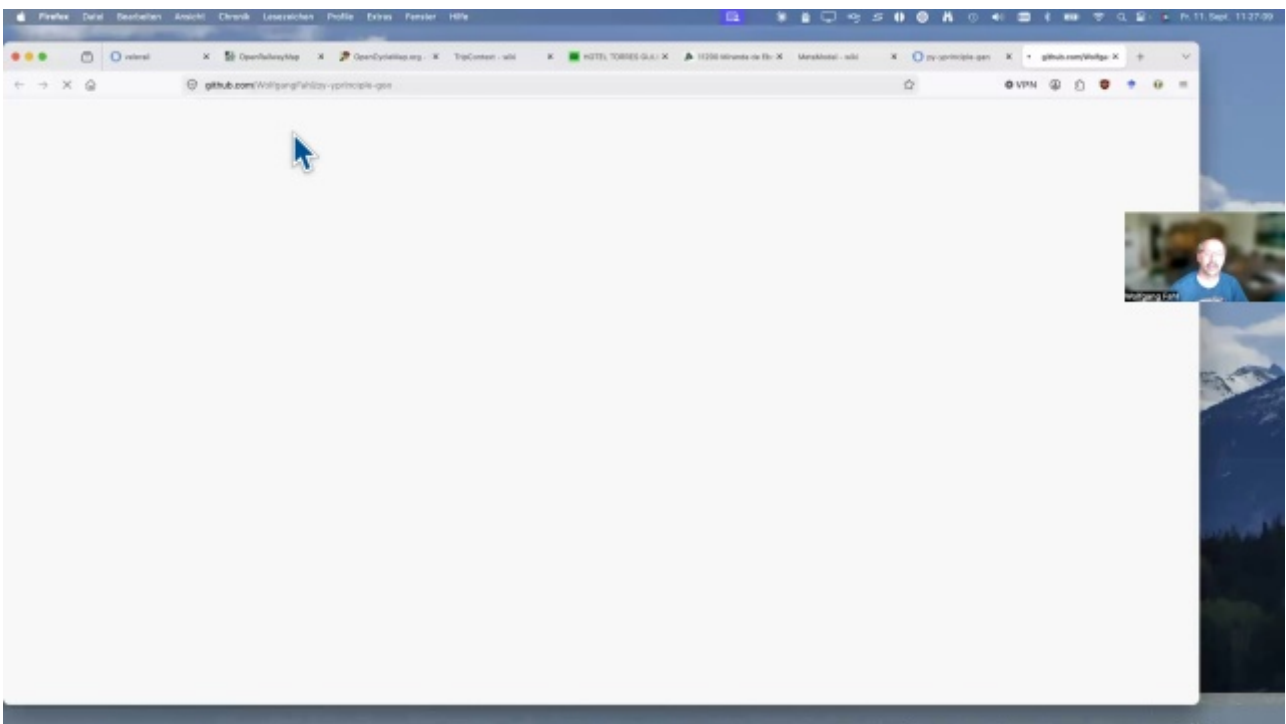

<https://ypgen.bitplan.com/>

ypgen, the tool that generates a wiki from a context, available on the internet; the page is still loading in the frame

29. GitHub - py-yprinciple-gen

08:01

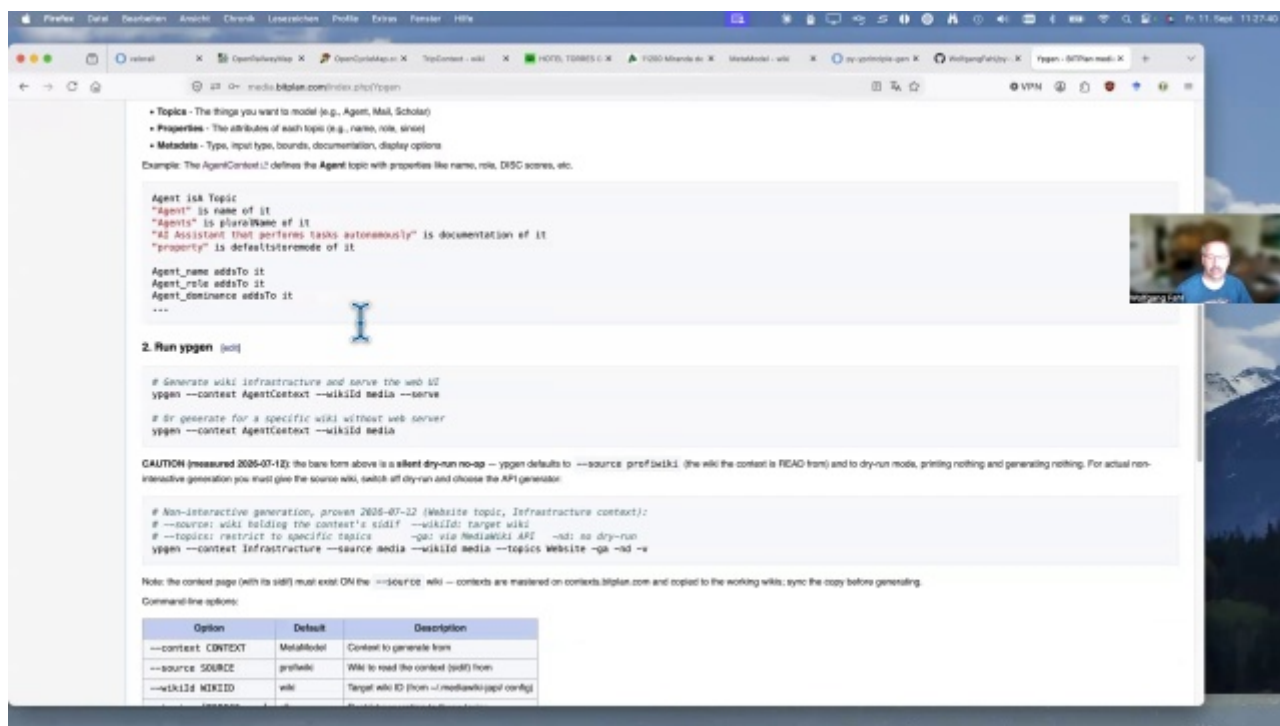

<https://github.com/WolfgangFahl/py-yprinciple-gen>

the open source project behind ypgen; the page is still loading in the frame

30. media.bitplan.com - Ypgen, Run ypgen

08:33

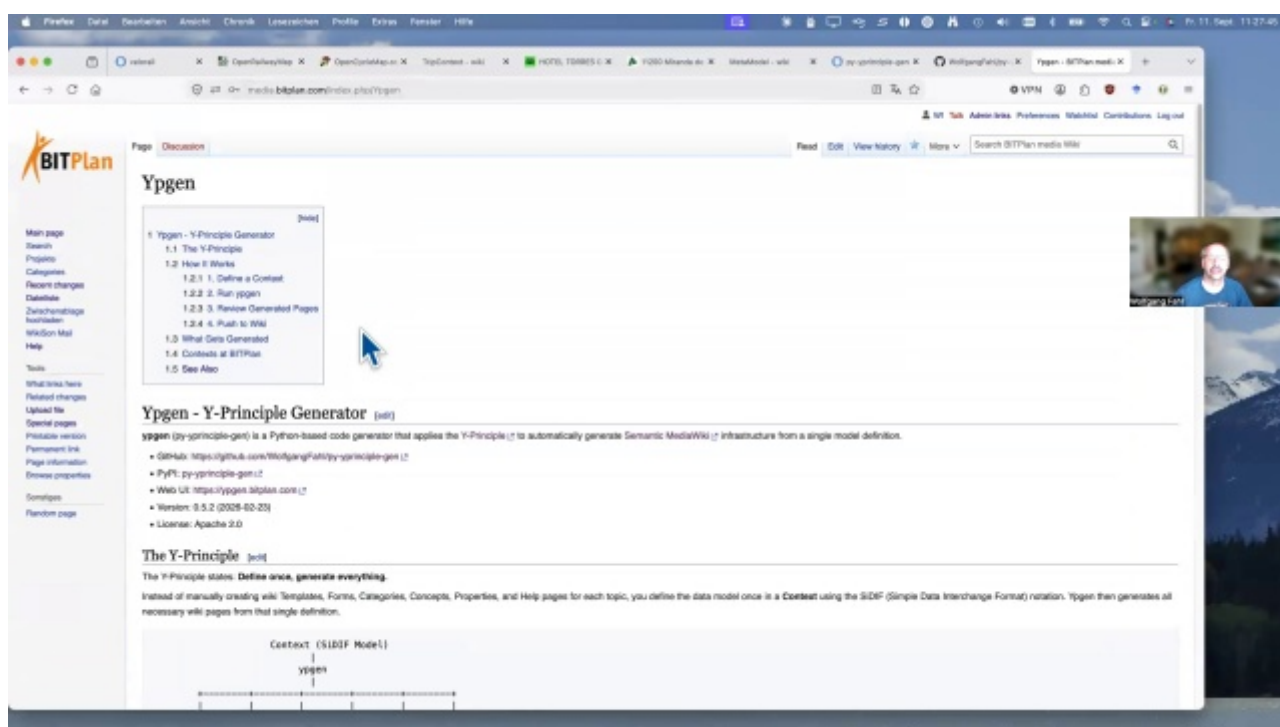

<https://media.bitplan.com/index.php/Ypgen>

the ypgen description page of the internal wiki, section Run ypgen with the command line options - the page an AI needs to read

31. media.bitplan.com - Ypgen, Y-Principle

08:37

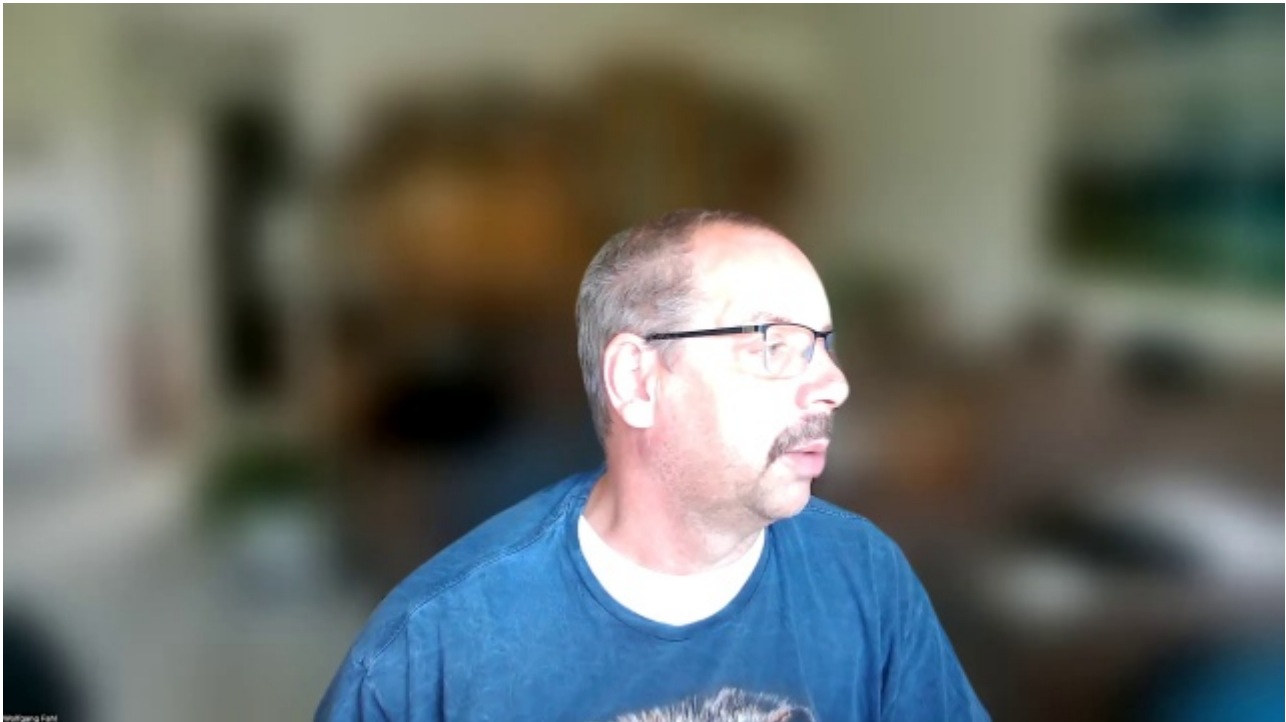

<https://media.bitplan.com/index.php/Ypgen>

top of the Ypgen page - the Y-Principle generator; the page could be pushed to a public wiki later to make life easier

32. Recording end - narrator

08:54

the AI should be capable of doing what is wanted based on this video alone; screen share and recording stop
